Hello, my name is Richard Wright; I have personal experience and information in regards to the investigation you have into the sheriff of Volusia County, Micheal J . This goes all the way back from my time with him in Philly when he demanded a bribe and shot at me. He also killed my friend, Rashad Williams, in full view of the public and then planted a gun and robbed him on top of that. He participated in a personal fraud against me, my company, and my service money. I believe Jason Stickles was used as a straw buyer, to launder that money that you're reported about. He also participated in a kidnapping which resulted in several deaths in 2019 inside of California, which is currently under investigation of HSI. so I would love to sit and talk with your team. I have a lot of personal information I can divulge and maybe assist in your investigation to make this information public and reached the Wright authorities he is under investigation by HSI, but it would be great to sit with you guys and give you my account. Currently, I am experiencing a situation where they were altering clerk records just

to force and affect arrest, and I have several court cases in which they continue to pursue to make attempts on my life using his sheriffs department, including child support. They're even altering documentation claiming that people aren't being served, forging judges signatures, and/or that certain dates are being changed on clerk record. The things like that are a serious issue. Hence the reason it's under investigation by federal authorities, but in the meantime, he continues to target me using this corruption and so I would like to sit with you guys .

My name is Richard Wright

Richard
